## PROFILE

Senior Backend Engineer with 11+ years of experience specializing in high-throughput distributed systems. Expert in Java/Spring Boot microservices and real-time stream processing with Apache Flink. Proven track record in transitioning monolithic banking systems to AWS EKS. A1 German speaker with previous on-site experience in Germany.

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Roche  
06/2024 – Present, Pune

- **Project:** Accu check SmartGuide Predict project, a CGM solution which provider real-time blood glucose monitoring for diabetes patients along with predictive alerts.
- Designed microservices architecture using Java 11/17, Spring Boot, REST API.
- Developed and deployed services using MongoDB, Docker, Kubernetes, Kafka, Jenkins CI/CD.
- Conducted code reviews for junior and fellow developers.
- Implemented caching mechanism and optimized queries to improve system performance by 20%.
- Added batch processing to improve performance of reading huge source files.

Senior Java Developer

LTIMindtree Ltd.  
08/2022 – 06/2024, Pune

- **Project:** Aggregated Risk project for the Portfolio of the Traders trading for the bank across 72 countries.
- Designed microservices architecture using Java 11/17, Spring Boot, REST API.
- Developed and deployed services using MongoDB, Docker, Kubernetes, Kafka, Jenkins CI/CD.
- Conducted code reviews for junior and fellow developers.
- Implemented caching mechanism and optimized queries to improve system performance by 20%.
- Added batch processing to improve performance of reading huge source files.

Senior Developer

Capgemini Ltd.  
06/2021 – 08/2022, Pune

- **Project:** Banking API Development for International Money Transfer and Conversion. Crafted custom APIs for Investment Banks to facilitate seamless money transfer and conversion across different countries.
- Led the migration of existing APIs from a monolithic architecture to a Microservices-based model.
- Designed and developed robust, secure, and scalable new APIs deployed to AWS Elastic Kubernetes Service (EKS).
- Created comprehensive test cases using Behavior-Driven Development (BDD) techniques.
- Pioneered the initial deployment of services to AWS, transitioning from on-premise hosting to a scalable cloud environment.

Technology Analyst

Infosys Ltd.  
02/2019 – 06/2021, Pune

- **Project:** Health Check Dashboard for Infosys NIA Bots. Conceived and crafted a dashboard for monitoring the health of NIA bots and providing remedies for system anomalies.
- Consumed data from APIs to display anomaly and health data on the dashboard.
- Wrote shell scripts to address common server anomalies such as cache management and server restarts.
- Designed and developed the user interface (UI) using JavaScript, HTML, and CSS.
- Served as the sole contributor, taking the project from inception to completion.

Software Developer

KSB Tech Pvt Ltd.  
10/2014 – 02/2019, Pune

- **Project:** Pump and Valves Configuration Software. Developed specialized configuration software for customized pump selection across Europe and Latin America.
- Designed and implemented configuration logic for various pump series to handle bespoke client requirements.
- Achieved significant performance improvements by optimizing SQL queries and eliminating unnecessary joins.

SKILLS

Java, Apache Flink, SpringBoot, Postgresql, MongoDb, MySQL, Kafka, Docker, AWS (Kinesis, S3, SQS, SNS, Cloudwatch, ECS, EKS, DynamoDB, EC2), Elasticsearch (ELK), Hibernate, JUnit, Mockito

ADDITIONAL INFORMATION

LANGUAGES

English - C2  
German - A1

EDUCATION

Bachlor's of Engineering - University of Pune  
(06/2010 - 06/2014)
